Sportsfloor Classic L

Swing systems

MegaSport Sportsfloor Classic L

Construction:

1 Linoleum	4,0 mm
2 Modular load distribution – consisting of plywood or OSB floor	12,0 mm
3 Modular swing distribution floor	16,0 mm
4 Modular swing beams	36,0 mm
Construction height ex factory	68,0 mm

Measured values

Force reduction in %	61,0
Vertical deformation in mm	2,7
Area of deflection in %	11
Rolling load in N	OK
Ball bounce in %	96
Friction	OK

EN 14904
Approved by **ISP** Germany

The **megasport Sportsfloor Classic L** is a highly consistent system elegantly integrating the individual parts as well as the materials and the connecting elements.

The construction consists of:

Modular swing beams – wooden swing beams (16/70 mm) and elastic vibration elements (20/70 mm).

Modular swing distribution (16/70 mm) – is fixed to the modular swing beams.

The Modular load distribution floor – consisting of a special floor made of OSB or plywood which is screwed on the Sinel modular swing distribution floor. The modular load distribution is plugged up and flat polished at the impact and screw range.

Linoleum Sportsfloor (4 mm) - fixed to the modular load distribution floor.
