Sportsfloor Modular W

Area elastic systems

MegaSport Sportsfloor Modular W

Construction:

1 2-layer parquet	10,0 mm
2 Modular load distribution, consisting of two MDF layers (2 x 8 mm)	16,0 mm
3 Modular elastic foam	15,0 mm
<hr/>	
Construction height ex factory	41,0 mm

The **megaspport Sportsfloor Modular W** is a highly consistent system elegantly integrating the individual parts as well as the materials and the connecting elements.

The construction consists of:

Elastic foam (15 mm) – a permanently elastic special composite foam partly sticking together and fixed with the substrate.

Modular load distribution floor - consisting of special MDF layers (2 x 8 mm). The two load distribution layers are stuck together and fixed in a crosswise layering and plugged up and flat polished at the impact and screw range.

2-layer parquet (755/117/10 mm) - with factory-applied pre-finished sealing consisting of 7 matched eco-friendly layers – fixed to the modular load distribution floor by using tongue and groove joints.

Laying pattern: herringbone, lamellae

Wood species: oak, beech, can. maple, ash

Measured values	Modular W
Force reduction in %	56,0
Vertical deformation in mm	2,6
Area of deflection in %	7
Rolling load in N	OK
Ball bounce in %	97
Friction	OK

According to DIN 18032-2 and EN 14904
Approved by **ISP** Germany
